

The Androgynous Aporia

Physical Strong's Concordance:

ISBN of 0-529-06334-4 (SCI-4-25931) World Bible Publishers Inc.

Digital Strong's Concordance:

Bibleanalyzer 5.6.5.13 (Windows) Strong's Hebrew & Greek dictionaries with TVM.

Masoretic Text:

1524-1525 Bomberg Mikraot Gedolot (the second Rabbinic Bible edited by Jacob ben Hayyim ibn Adonijah). 1611 translators primary Hebrew text.

Textus Receptus:

1598 Theodore Beza (5th edition). 1611 translators primary Greek text. They also used the 1550 Robert Estienne (Stephanus) *Editio Regia* (Royal Edition), the Desiderius Erasmus (1516-1535), and The Complutensian Polyglot (1514/1522).

English Bible:

Standard AV1769 AKA "The King James Version".

Note: Modern Hebrew Bibles (like the Biblia Hebraica Stuttgartensia 1977) are instead based on the Leningrad Codex (dated to 1008AD) which was not available to the 1611 translators (and which didn't enter the "public eye" until around 1862 when Abraham Firkovich sold his collection to the Imperial Library in St. Petersburg. The differences are purportedly minor, and not doctrinal, but since I'm not even remotely a Hebrew scholar I will stick to the 1611 translators preferred "fountain-head" (cf. "The Translators to the Reader" 1611, first edition, Holy Bible. An online scan is available at the following URL:

<https://archive.org/details/1611TheAuthorizedKingJamesBible>).

Note: An understanding of Hebrew and Greek and the sources listed above are not required to understand what this study illuminates. A very rudimentary understanding of Hebrew and Greek, which you can learn online as you progress through this study, will allow you to understand the entire study.

Before starting, we also need to understand that when we're looking in the Hebrew section of the Strong's dictionary, it uses the label "primitive root" in a way we might not expect. Hebrew primitive roots (*shoresh*) which are typically made up of only 3 consonants have no vowels (*niqqud*) and as such are not pronounceable words by themselves. Thus, the dictionary lists the simplest possible *verb* form to represent the root and not the actual primitive root itself.

Acronyms used throughout this document typically refer back to the sources listed above.

English = The AV1769 English

Strong's/SC = Strong's physical concordance

SH = Strong's Hebrew (in the physical concordance; dictionary section in the back)

OT = Old Testament (Hebrew/Syriack)

NT = New Testament (Koine Greek)

MT = Masoretic Text (Hebrew OT)

TR = Textus Receptus (Greek NT)

Our first example is from pg. 169 of SC under the entry for “Canaanitess” which is tagged with the code H3669. There is only one reference for this entry and that is 1 Chronicles 2:3.

3665. כָּנַע **kâna'**, kaw-nah'; a prim. root; prop. to bend the knee; hence to humiliate, vanquish:—bring down (low), into subjection, under, humble (self), subdue.

3666. כִּנְעָה **kin'âh**, kin-aw'; from 3665 in the sense of folding [comp. 3664]; a package:—wares.

3667. כְּנַעֲנִי **K^ena'an**, ken-ah'-an; from 3665; humiliated; Kenaan, a son of Ham; also the country inhabited by him:—Canaan, merchant, traffick.

3668. כְּנַעֲנָה **K^ena'anâh**, ken-ah-an-aw'; fem. of 3667; Kenaanah, the name of two Isr.:—Chenaanah.

3669. כְּנַעֲנִי **K^ena'anîy**, ken-ah-an-ee'; patial from 3667; a Kenaanite or inhabitant of Kenaan; by impl. a pedlar (the Canaanites standing for their neighbors the Ishmaelites, who conducted mercantile caravans):—Canaanite, merchant, trafficker.

Look very carefully at the last character of the SH for H3669 (Hebrew is read from Right-to-Left as opposed to English which is Left-to-Right) כְּנַעֲנִי. That last character is called a Yod ך suffix, and when it appears at the end of a nationality or a person’s name, it is the standard marker that conveys *masculine singular*. And you may wonder, as I did, why did SC tag a clearly feminine word (“Canaanitess”) with a *masculine* Hebrew word? And that’s a very good question to ask! Unfortunately, because SC itself doesn’t offer an explanation for this, your guess is as good as mine. I’m just going to show you a few examples (of which many more are available to the curious) that allow us to understand that SC/SH might not necessarily be useful in ways that we might think it is: for example, studying **Biblical** Hebrew or Greek. I realize that may be a shocking statement to some so without further ado, let’s move on to the overwhelming evidence that supports that statement.

Our first stop is comparing the SH word to the MT itself because we know the English itself is perfect and anything that disagrees with it is “wrong” (quotes because it is clear that SC does not even try to precisely represent the MT/TR text itself and assuming it does is where the real error comes from).

	MT 1Ch 2:3 “Canaanitess”	Strongs H3669	Function
Prefix	ה (Ha)	ה (Ha)	Definite article (The)
Body	כְּנַעֲנִי (Kena'an)	כְּנַעֲנִי (Kena'an)	Root (Canaan)
Suffix	י (Yod)	י (Yod)	Gentilic/identity marker (-ite)
Feminine suffix	ת (Tav)	Missing	Feminine marker (-ess)

The MT that was translated to “Canaanitess” clearly has the feminine suffix. If it didn't have that marker, the translators *might* have written “Canaanite” instead. The reason I chose the word “*might*” is because the KJV is a “formal equivalent” and not a literal translation.

There are listed, below and elsewhere, for example, Hebrew idioms that if they were translated literally we very well might not understand them at all (eg. [Gen 1:20](#) “in the open” is “upon the face” in the MT).

Instead, the idiom itself was translated into something that English readers can easily understand (a formal equivalent).

The reverse is also true, sometimes the literal MT Hebrew was translated into an English idiom (eg. [Mat 23:33](#) “generation” is plural in the TR, but “singular collective” in English).

If you are wondering, as I did, [1Ch 2:3](#) is not the only verse where the Strong's number assigned to a word does not carry the full meaning from the MT/TR. This is an extremely small sample and if you need more evidence there is no shortage.

Verse	English	MT	Grammar
Genesis 46:10	a <u>Canaanitish</u> woman	הַכְּנַעֲנִית (ha-Kena'anith)	Feminine singular The same as 1Ch 2:3 “Canaanitess”
Ezra 9:1	of the <u>Canaanites</u>	הַכְּנַעֲנִי (ha-Kena'aniy)	Masculine singular Translated to <i>plural</i> based on context
Neh 9:8	the <u>Canaanites</u>	הַכְּנַעֲנִי (ha-Kena'aniy)	Masculine singular Translated to <i>plural</i> based on context
Job 41:6	<u>merchants</u>	כְּנַעֲנִים (Kena'anim)	Masculine plural
Oba 1:20	of the <u>Canaanites</u>	כְּנַעֲנִים (Kena'anim)	Masculine plural
Zec 14:21	no more the <u>Canaanite</u>	הַכְּנַעֲנִי (ha-Kena'aniy)	Masculine singular Translated to <i>singular</i> based on context

With many other examples existing exactly like this, these are confirmation that Strong's is only showing us the *base form* of each word and not the **exact** variation that is used in the MT itself.

A remaining unsolved mystery is that sometimes the Strong's definition *does* list other forms of a root (eg. H4125) and those other forms **may or may not** be equivalent to what we find in the MT/TR. Regardless, it is fully evident in both the English and the Hebrew/Greek that SC is not even attempting to precisely reflect the original text, and that puts limits on it's functionality.

Looking into H3669 more, we find that there is a *feminine singular* form codified as H3668. But, “strangely” it is not used where we might think it should be used (eg. [1Ch 2:3](#)).

Strong's	Strong's Hebrew	Grammar
H3665	כָּנַע (Kâna')	Masculine singular verb (3 rd person)
H3667	כְּנַעַן (Kena'an)	Masculine singular Proper noun
H3668	כְּנַעֲנָה (Kena'ănâh)	Feminine singular noun
H3669	כְּנַעֲנִי (Kena'ănîy)	Feminine singular adjective/Gentilic

The feminine singular form is not in the reference chain for [1Ch 2:3](#) “Canaanitess”:

[H3669](#) → [H3667](#) → [H3665](#)

The Strong's *feminine singular* form H3668 appears 5 times in the following verses as the English word

“Chenaanah” כְּנַעֲנָה (ken-ay-uh-nuh): [1Ki 22:11](#), [22:24](#), [1Ch 7:10](#), [2Ch 18:10](#), [23](#).

As it turns out, the Strong's Hebrew not matching the actual MT is by no means a rare anomaly which suggests it's not a simple error. In fact, the opposite is true: it is very rare for the Strong's Hebrew to match exactly what the MT/TR has.

What's with the discrepancies? Why doesn't the Strong's Hebrew exactly match the actual Hebrew? My best guess after much research and reviewing many examples, more of which are below, is that Strong's was never meant to be a replacement for the actual text much like a dictionary is not intended to be a replacement for any literary work. Why Strong's differs from what we would expect from an English dictionary is likely due to a combination of the various nuances of Hebrew and Greek and it's *intended* purpose. From the first sentence of the preface itself it's primary goal is to be a “thorough verbal index” (whatever that means because they don't explain it).

I think of it like this (even though it isn't perfect): Strong's is the compass and the original text is the map.

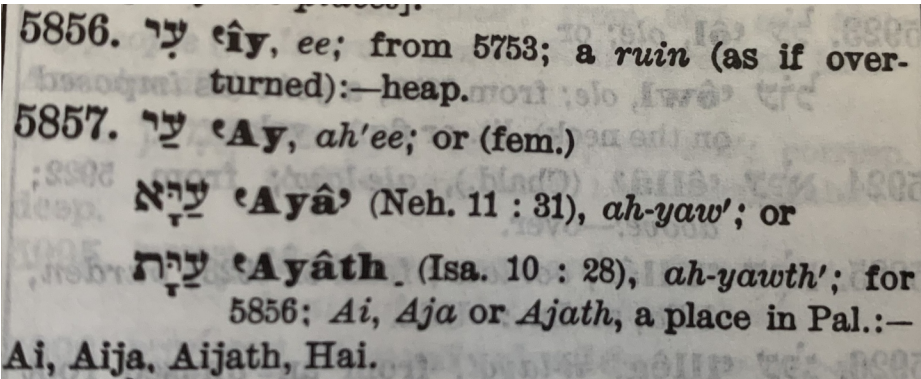

One of the benefits of classifying everything using the simplest forms is the interconnectedness that arises. There are naturally more connections between the “roots” of words than there are between the different forms of those “roots”. By looking at every usage of any given Strong's number we are then led to every form of that “root” that is used throughout scripture.

One of the downsides, is that those that are unfamiliar with the basics of the Hebrew and Greek languages are easily susceptible to both thinking on their own and being taught false doctrine that SC can be used for things it may not ever have been intended to be used for.

Thus, for example, if one might think that using SC allows one to better understand or learn Biblical Hebrew or Greek, that will very quickly lead to error, as we have already seen.

That by no means means that SC is an invaluable resource. What it does mean, is that the reader/user thereof *absolutely must* be aware of the limitations of SC in order to use it effectively. It is **not** a tool for either beginners or novices.

A good example of that benefit I just described is looking at H5857. It connects all four English forms of what appears to be the same location: Hai, Ai, Aija, and Aiath. Now, compare that to connecting all four of these forms together using only the English and Strong's quickly becomes a real work-saver. Unfortunately, Strong's does not include a convenient index of where each Strong's number appears in scripture and that is what led to me writing custom software to do just that (eg. if I want a list of every verse where H5857 appears).

The following are all codified as H5857 (the SH shows 3 forms and they are all feminine singular). Some sources include H5857 next to “city H5892” at the end of [Jos 8:12](#) and I excluded that one.

Verse	English	MT	Transliteration	Grammatical Form
Gen 12:8	Hai	הָעַי	(ha-Ay)	<i>Feminine singular</i> Proper Noun with definite article
Jos 7:2	Ai	הָעַי	(ha-Ay)	<i>Feminine singular</i> Proper Noun with definite article
Neh 11:31	Aija	עַיָּה	(Ayya)	<i>Feminine singular</i> Proper Noun with ם (emphatic/Aramaic suffix)
Isa 10:28	Aiath	עַיָּת	(Ay-yath)	<i>Feminine singular</i> Proper Noun with ת (feminine suffix)

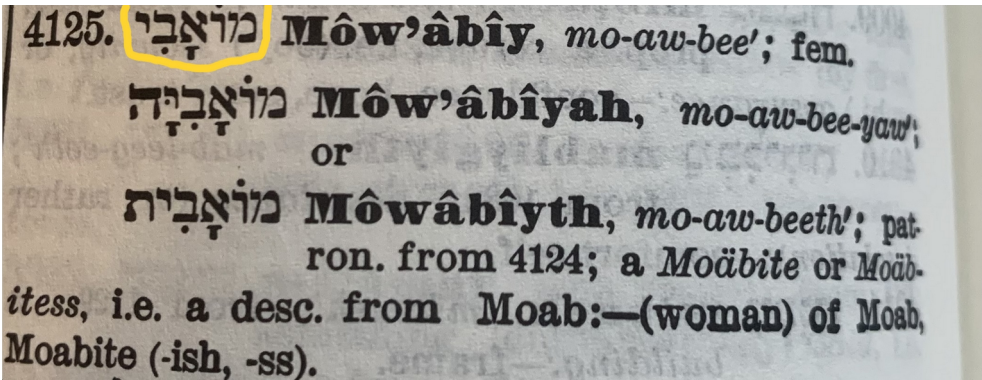

Notice that while [Neh 11:31](#) & [Isa 10:28](#) have exact matches in the SH, that is **not** the case for both [Gen 12:8](#) & [Jos 7:2](#) whose forms are not exactly represented. SH drops the definite article הָ and gives us only the proper noun. And this is exactly what we expect from a normal dictionary. When we want to lookup “Sun” we don’t look for “The Sun”. We drop the definite article “the” and simply lookup the base noun without any modifiers.

This also confirms that Strong's does not always list the masculine singular form of every word. And the reason for that is because it is a proper noun (based on a rule in Hebrew). In [1Ch 2:3](#) “Canaanitess” is not even a common noun: it is instead used as a Gentilic Adjective in the MT and so it’s “standard” masculine singular form is listed in Strong's.

Interesting side note:

The KJV translators, instead of writing “The Ai” in [Gen 12:8](#) & [Jos 7:2](#) (which is usually how it would be translated because of the definite article הָ) chose instead to add the “H” sounding Hebrew definite article prefix to the English word itself: thus, we have “H-Ai” instead of “The Ai”.

The following is the Strongs entry for H4125 which is used 16 times.

Verse	English	MT	Strongs
Deuteronomy 2:11	Moabites	מוֹאֲבִים (Mo'abim) <i>Masculine plural</i>	H4125
Deuteronomy 23:3	Moabite	מוֹאֲבִי (Mo'abiy) <i>Masculine singular</i>	H4125
Ruth 1:4	Moab	מוֹאֲבִיּוֹת (Mo'abiyoth) <i>Feminine plural</i>	H4125

Notice that neither [Deu 2:11](#) nor [Ruth 1:4](#) have an exact match between the MT and the Strongs Hebrew and that neither of them are the “standard” *masculine singular*.

Notice also that the first form given in the Strongs Hebrew is *masculine singular* (just like in [1Ch 2:3](#)). That is then followed by the two feminine forms. That gives us 3 possible forms for any one of the 16 possible times that H4125 appears. This pattern clearly shows us that Strongs is not trying to tell us *exactly which* form was used. And at the same time, this creates a “base connection” between all the different forms based on the same Hebrew “root”.

Genesis 14:10

English	MT	Strong's
And the vale	וַעֲמָק	6010 (under <i>Vale</i> pg. 1094)
of Siddim	הַשְּׂדִיִּים	7708 (under <i>Siddim</i> pg. 925)
was full of	בְּאֶרֶת בְּאֶרֶת	(No Number Provided for two Hebrew words “pits pits”)
slimepits	חֲמָר	2564 (under <i>Slimepits</i> pg. 938)
and the kings	וּמְלָךְ	4428 (under <i>Kings</i> pg. 571)
of Sodom	סְדֹם	5467 (under <i>Sodom</i> pg. 945)
and Gomorrah	וַעֲמֹרָה	6017 (under <i>Gomorrah</i> pg. 413)
fled	נָסוּ	5127 (under <i>Fled</i> pg. 356)
and fell	וַיִּפְּלוּ	5307 (under <i>Fell</i> pg. 344)
there	שָׁמָּה	8033 (under <i>There</i> pg. 1014)

The words “pit” and “pits” both have an entry in SC on page 792, but [Gen 14:10](#) is not listed in either one of them. If Strong's were attempting to precisely represent the text these would necessarily be included.

The idiomatic expression in English “pits pits” in Hebrew is called “reduplication” and it is a grammatical feature of the language that expresses different nuances depending on how the words are repeated:

Term	Usage	Biblical Example
Superlative Degree	Repeating a noun to show the highest quality.	<i>Literal: Holy of holies</i> English: most holy (Exodus 26:33)
Intensive Reduplication	Repeating a word twice to mean "very," "much," or "continually."	<i>Deep deep</i> (Ecc 7:24 translated as "exceeding deep"; Gen 14:10)
Distributive Reduplication	Repeating a word to mean "every" or "each."	<i>Year year</i> (Deu 14:22 translated as "year by year")
The Polypoton	Using different forms of the same root (common in the Infinitive Absolute).	<i>Dying thou shalt die</i> (Gen 2:17 translated as "thou shalt surely die")

Sample analysis of reduplication: MT vs. SH

Verse	MT	English	Strong's	Does SC Tag Both?	Does SH = MT?
Exo 26:33	הַקֹּדֶשׁ הַקֹּדֶשׁ־שָׁמַיִם	"the most holy"	H6944 (most) H6944 (holy)	Yes (twice with the same exact word)	No - The KJV uses "most" to translate the Plural found in the MT; SH only shows the Singular root.
Ecc 7:24	עֲמֹק עֲמֹק	"exceeding deep"	H6013 (Deep)	No (Only tags one)	No - The KJV uses "exceeding" to translate the repetition (the second <i>amok</i>); SH ignores the second word entirely.
Deu 14:22	שָׁנָה שָׁנָה	"year by year"	H8141 (Year)	Yes (twice with the same exact word)	No – Neither form in SH match the MT exactly.
Gen 2:17	מָוֶת מָוֶת	"surely die"	H4191 / H4191	Yes (but, both root forms and the exact same word)	No - The KJV "thou shalt" matches the MT 2nd Person; SH uses the 3rd Person root "to die."
Gen 14:10	בְּאֶרֶת בְּאֶרֶת	"full of slimepits"	H2564 (Slimepits)	No (Both <i>be'eroth</i> are untagged)	No - The KJV "full of" is the translation of the reduplication; SH lists the root as Singular and Absolute (ignores the construct state).

From this we learn that the focus is on tagging the English words and not every Hebrew word. Maintaining the precision of the original language, as we will see in every example, is not even attempted.

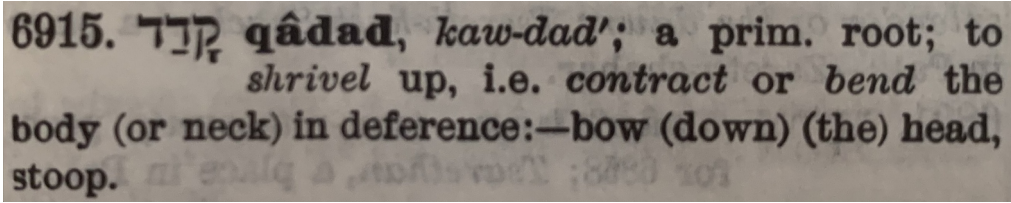

In the MT for **Genesis 43:28** the entire English phrase “*they bowed down their heads*” is represented by a single Hebrew verb וַיִּקְדְּוּ (Vay-yiq-qedu) 3rd person, *masculine plural, Waw-Consecutive Imperfect*.

In SC, under the listing for “heads” you’ll find **Gen 43:28** H7218 (roshe) which at first glance makes sense – except that Hebrew word is not in the MT. The only logical explanation I can think of for this addition is that tagging the English words is a higher priority than precisely representing the MT.

Genesis 43:28

English	MT	Strong’s	Grammatical Discrepancy
And they answered	וַיֹּאמְרוּ	H559 (אָמַר)	MT: 3rd Masc. Plural, Waw-Consec. Imperfect SH: 3rd Masc. Sing. Qal Perfect (Root)
Thy servant	עַבְדְּךָ	H5650 (עָבַד)	MT: Masc. Sing. Noun + 2nd Masc. Sing. Suffix ("Thy") SH: Noun (Root)
our father	אָבִינוּ	H1 (אָב)	MT: Masc. Sing. Noun + 1st Common Plural Suffix ("Our") SH: Noun (Root)
is in good health	שָׁלוֹם	H7965 (שָׁלוֹם)	MT: Masc. Sing. Noun (used as an adjective). SH: Noun (Root)
he	הוּא	H1931 (הוּא)	MT/SH Match: 3rd Masc. Sing. Pronoun
is	(None)	(No Entry)	The "is" is not a separate word in Hebrew (implied)
yet	עוֹדָנִי	H5750 (עוֹד)	MT: Adverb + 3rd Masc. Sing. Suffix ("him/he") SH: Adverb (Root only)
alive	חַי	H2416 (חַי)	MT: Adjective, Masculine Singular SH: Adjective (Root)
And they bowed down	וַיִּקְדְּוּ	H6915 (קָדַד)	MT: 3rd Masc. Plural, Waw-Consec. Imperfect SH: 3rd Masc. Sing. Qal Perfect (Root)
their heads	(NOT PRESENT)	H7218 (רֹאשׁ)	SH tags a word that is absent from the MT but is present in the English
and made obeisance	וַיִּשְׁתַּחֲוּוּ	H7812 (שָׁחָה)	MT: 3rd Masc. Plural, Waw-Consec. Imperfect SH: 3rd Masc. Sing. Qal Perfect (Root)

Additionally,

Strong's H6915 provides the lexical root (Qadad), which is stripped of the Vav-consecutive (And), the plurality (they), and the narrative aspect found in the MT's וַיִּקְדְּוּ. Strong's provides a “static” dictionary form, whereas the MT provides the “active” gendered and numbered event.

In the MT for **2Sa 22:20** the English phrase “large place” is represented by a single Hebrew noun מֶרְחָבֹ (merchab). Strong's assigns both H4800 (merchab) to “large” and H4725 (maqowm/...) to “place”, but there’s only one Hebrew word in the MT (and it is quite sufficient on it’s own to represent “large place” as evidenced by the English).

2 Samuel 22:20

English	MT	Strong's	Grammatical Comparison
He brought me forth	וַיּוֹצֵא	H3318 (יָצָא)	MT: 3rd Masc. Sing. Hiphil Waw-Consec. Imperfect. SH: 3rd Masc. Sing. Qal Perfect (Root).
also	אֲתִי	(No Entry)	In the KJV, "also" is the translation of the direct object marker (<i>et</i>) with a 1st person suffix. SH usually ignores this marker.
into a	לְ	(No Entry)	MT: Lamed preposition + definite article (Pathach/Dagesh). SH: Lexicons do not tag these prefixes separately.
large	מֶרְחָבֹ	H4800 (מֶרְחָבֹ)	MT/SH Match: Masc. Sing. Noun. In this verse, it carries the Pausal accent.
place	(Included above)	H4725 (מָקוֹם)	SH tags H4725 for "place" even though the word <i>Maqom</i> is entirely absent from the MT in this verse.
he delivered me	יְחַלֵּצֵנִי	H2502 (חָלַץ)	MT: 3rd Masc. Sing. Piel Imperfect + 1st Person Suffix. SH: 3rd Masc. Sing. Qal Perfect (Root).
because	כִּי	(No Entry)	The conjunction <i>Ki</i> is often left untagged in the main concordance index for this verse.
he delighted	חִפֵּץ	H2654 (חִפֵּץ)	MT/SH Consonant match: 3rd Masc. Sing. Qal Perfect. See audit below.
in me	בִּי	(No Entry)	MT: Beth preposition + 1st Person Suffix. SH: Lexicons generally skip prepositional suffixes.

Grammatical Audit: H2654

Feature	MT	Strong's (H2654 Entry)	Comparison Result
Hebrew Word	חִפֵּץ	חִפֵּץ	Exact match in consonants.
Person	3rd Person	N/A (Primitive root)	Mismatch: Strong's removes the personal subject.
Gender	Masculine	N/A	Mismatch: Strong's ignores the masculine inflection.
Number	Singular	N/A	Mismatch: Strong's ignores the singular state.
Tense/Type	Qal Perfect (completed action)	Verb (undefined tense)	Mismatch: Strong's provides a lexical category, not a tense.

In the MT for **Gen 1:20**, Strongs assigns H6440 “the face” to the MT Hebrew word **עַל־פָּנָי** and the English reads “the open”.

These two phrase convey **very** different meanings. It’s because the phrase **עַל־פָּנָי רָקִיעַ** (al-pene reqia) is a Hebrew *idiom* that means “upon the face of the firmament”. Strong’s gives us the technical definition of the words used and in doing so does not convey that it is an idiom or what it means. Thus, if we try to use SC/SH to better understand the Hebrew, we would be left scratching our heads.

Genesis 1:20

English	MT	Strongs	Grammatical Comparison
And God said	וַיֹּאמֶר אֱלֹהִים	H430 (אָמַר) H559 (אָמַר)	MT: 3rd Masc. Sing. Waw-Consec. Imperfect / Masc. Plural Noun. SH: 3rd Masc. Sing. Roots.
Let the waters	הַמַּיִם	H4325 (מַיִם)	MT: Masc. Plural Noun + Definite Article. SH: Noun (Root only).
bring forth abundantly	יִשְׂרָצוּ	H8317 (שָׂרַץ)	MT: 3rd Masc. Plural, Jussive (Command). SH: 3rd Masc. Sing. Qal Perfect (Root).
the moving creature	שָׂרֵץ	H8318 (שָׂרֵץ)	MT/SH Match: Masculine Singular Noun.
life	נֶפֶשׁ חַיָּה	H5315 (נָפֶשׁ) H2416 (חַי)	MT: Fem. Sing. Noun / Fem. Sing. Adjective. SH: Fem. Sing. Noun / Root Adjective.
and fowl	וְעוֹף	H5775 (עוֹף)	MT: Masc. Sing. Collective Noun + Conjunction. SH: Noun (Root only).
may fly	יְעוֹפֵף	H5774 (עוֹף)	MT: 3rd Masc. Sing. Polel Imperfect. SH: 3rd Masc. Sing. Qal Perfect (Root).
above the earth	עַל־הָאָרֶץ	H5921 (עַל) H776 (אָרֶץ)	MT: Preposition / Noun + Article. SH: Roots only.
in the open	עַל־פָּנָי	H6440 (פָּנָה)	MT uses a construct "face of" (<i>pene</i>) SH lists the root for "face" under the English "open."
firmament	רָקִיעַ	H7549 (רָקִיעַ)	MT: Masc. Sing. Construct ("Firmament of"). SH: Masc. Sing. Noun (Absolute).
of heaven	הַשָּׁמַיִם	H8064 (שָׁמַיִם)	MT: Masc. Dual/Plural Noun + Definite Article. SH: Noun (Root only).

The following examples exist to simply prove that what we have seen is not unique to the OT.

Matthew 20:16

Lack of precision (very common as we have already seen)

English	1598 TR (Inflected Form)	Strong's (Lexical Form)	Strong	Difference Analysis
for	γάρ (gar)	γάρ (gar)	G1063	Identical. Conjunctions/Particles do not change form.
many	πολλοί (polloī)	πολύς (polys)	G4183	TR: Masculine Plural. Strong's: Masculine Singular.
be	εἰσιν (eisin)	εἰμί (eimi)	G1510	TR: 3rd Person Plural. Strong's: 1st Person Singular.
called	κλητοί (klētoi)	κλητός (klētos)	G2822	TR: Masculine Plural. Strong's: Masculine Singular.
but	δέ (de)	δέ (de)	G1161	Identical. This particle is "indeclinable" (it never changes).
few	ὀλίγοι (oligoī)	ὀλίγος (oligos)	G3641	TR: Masculine Plural. Strong's: Masculine Singular.
chosen	ἐκλεκτοί (eklektoi)	ἐκλεκτός (eklektos)	G1588	TR: Masculine Plural. Strong's: Masculine Singular.

In this example, none of the Greek words match exactly between the Strong's and the TR.

Matthew 1:25

It's simply impossible to get the grammar correct using Strong's definitions

English	1598 TR (Inflected)	Strong's (Lexical)	Strong's	Comparison & Distinction
she brought forth	ἔτεκεν (eteken)	τίκτω (tikto)	G5088	TR: 3rd Person Singular (Past). Strong's: 1st Person ("I bring forth").
her	αὐτῆς (autēs)	αὐτός (autos)	G846	TR: Feminine Genitive (Possessive). Strong's: Masculine Nominative ("He").
firstborn	πρωτότοκον (prōtotokōn)	πρωτότοκος (prōtotokos)	G4416	TR: Accusative (Direct Object). Strong's: Nominative (Subject).
son	υἱόν (huion)	υἱός (huios)	G5207	TR: Accusative (Direct Object). Strong's: Nominative (Subject).

If we take all the Strong's Greek words and read them we get: "I bring forth he firstborn son".

Matthew 23:33

Idioms will have you barking up the wrong tree every time

Source	English	Greek Form	Ending	Number	Comparison Analysis
TR	generation	γεννήματα (<i>gennēmata</i>)	-ατα	Plural	The -τα indicates "broods" or "offsprings."
Strong's G1081	generation	γέννημα (<i>gennēma</i>)	-α	Singular	The lexical base refers to a single "offspring."

Here, when you check Strongs against the English word – they agree that they are both singular and everything *looks* hunky-dory. That is until you read the TR which contains the **plural** form.

“generation” appearing as a singular here is an English idiom (it’s a collective singular, the same as we use “army” as a singular that refers to a collective group of people).

Matthew 27:46

Broken pronunciation and invalid cross reference

Source	English (KJV)	Exact Spelling	Pronunciation Key	Grammar/Origin
TR	Eli, Eli	Ἠλί Ἠλί	Ay-lee	Hebrew/Aramaic (transliterated)
Strong's G2241	Eli, Eli	ἡλί ἡλί	Hay-lee	"Rough breathing mark" (forces an “H” sound)

Feature	TR	Strong's G2241
Initial Letter	Ἡ (Uppercase Eta)	η (Lowercase eta)
Breathing Mark	Smooth (´) - No "H"	Rough (´) - "H" sound
Accent	Acute (i) on the iota	Acute (i) on the iota
KJV Alignment	Perfect ("Eli")	Incorrect ("Heli" sound)

The pronunciation for Strongs G2241 forces a hard “H” sound (“Heli”) whereas in the actual text the “H” is silent (“Eli”).

G2241 cross references H430 **ἐλ** (‘el). Notice the lack of a possessive Yod suffix (י). Both the TR and the translation given in the English for **Mat 27:46** use “**My** God, **my** God” not “God, God” as the cross reference to H430 would be rendered.

This is actually not a technical error as it may appear. It instead appears intentional. The possessive, gender, number, tense, etc. being stripped away is normal as we have seen. You won’t find “My son” in an English dictionary but you will find both “my” and “son” as separate entries.

This example shows us that if we try to use Strongs for either pronunciation or for reconstructing what is actually written then we would create these types of technical errors (and more).

Acts 7:45 vs Matthew 1:1

Loss of precision

Βίβλος γενέσεως Ἰησοῦ Χριστοῦ
Biblos geneeseōs Iēsou Christou

Source	Verse	English	Greek	Grammar	The Conflict
TR	Acts 7:45	Jesus (Joshua)	Ἰησοῦ	Genitive	The TR uses the genitive case to show the fathers entered with (meta) Jesus/Joshua, conveying "the company" via the word ending.
TR	Matt 1:1	Jesus (Christ)	Ἰησοῦ	Genitive	The TR uses the genitive case to show that the generation belongs to Jesus Christ, conveying possession directly in the word itself.
Strong's	Acts 7:45	Jesus	Ἰησοῦς	Nominative	Strong's (G2424) lists only the root/subject form. It ignores the prepositional relationship found in the actual text.
Strong's	Matt 1:1	Jesus	Ἰησοῦς	Nominative	Strong's (G2424) provides a generic title. It fails to show the specific possessive relationship present in the TR.

Additionally, The TR (Ἰησοῦ) is pronounced “ee-ay-SOO” and is not the same pronunciation as the Strong's (Ἰησοῦς) “ee-ay-SOOS”

Revelation 1:11

More of the same, just to show it's not an anomaly

TR	English	Strong's	Grammatical Form
τὸ Α	The Alpha	G1 (Α)	Noun
καὶ	and	G2532	Conjunction
τὸ Ω	The Omega	G5598 (Ω)	Noun

The English conveys the definite article Tau Τὸ (G3588) by capitalizing “Alpha” and “Omega”.

The TR literally reads “I am the (one and only) Alpha and the (one and only) Omega”.

Strong's classifies each of these as simply the first and last letter of the Greek alphabet (“I am an alpha and an omega”).

Matthew 2:1
A legitimate oversight indeed

English	TR	Strong's	Nature of the Differences
Jesus	Ἰησοῦ	Ἰησοῦς	Case Change: The TR uses the Genitive (ending in -u); the dictionary gives a Nominative (ending in -ς).
was born	γεννηθέντος	γεννάω	Tense Change: The TR uses a specific Passive Participle (the act of being born); the dictionary gives the Present Tense root (to procreate).
Bethlehem	Βηθλεέμ	Βηθλεέμ	G965; exact match
Judaea	Ἰουδαίας	Ἰουδαία	Case/Gender: The TR uses the Genitive form; the dictionary gives the Nominative base form.
days	ἡμέραις	ἡμέρα	Number Change: The TR is Plural (multiple days); the dictionary is Singular (one day).
Herod	Ἡρώδου	Ἡρώδης	Case Change: The TR is Genitive (Herod's days); the dictionary is Nominative.
king	βασιλέως	Missing	No entry under “king” (G935) for Mat 2:1 despite the word clearly existing in the TR.
came	παρεγένοντο	παράγινομαι	Mood/Voice: The TR uses the Aorist Middle (specific historical action); the dictionary gives the Present root.
wise men	μάγοι	μάγος	Number/Definition: The TR is Plural; the dictionary is Singular. The inflection is completely dropped and thus so is the full meaning of the original Greek word.
men	(In μάγοι)	NONE	Absence: The TR has the inflection. Strong's is blank. From the section (in the beginning of the concordance) entitled “Directions and Explanations”: “The absence of a number at the end of the passage shows that the word in question is not there the rendering of any particular term in the original, having either been supplied by the translators for the purpose of greater clearness (in which case in ordinary Bibles it is printed in italics), or being the representative merely of some inflectional form (auxiliary, preposition, adjunct, etc.)...” In this case the entry for “men” is appropriately blank (because it is an inflection) but then the inflection is stripped away for the word where it belongs.
east	ἀνατολῶν	ἀνατολή	Number Change: The TR is Plural (literal "risings" of the sun); the dictionary is Singular.

Summary

Strong's Hebrew and Greek does not guarantee the conveyance of the following grammatical information:

- **Gender**
 - Feminine, masculine, neuter
- **Number**
 - Singular, plural (Dual in some Hebrew contexts)
- **Tense**
 - Past, present, future (Aspect for Hebrew/Greek)
- **Case**
 - Nominative, genitive, accusative, dative, vocative
- **Person**
 - 1st, 2nd, 3rd ("perspective")
- **Mood**
 - Indicative, imperative, subjunctive
- **Voice**
 - Active, Passive, Middle

John 16:13

Howbeit when he, the Spirit of truth, is come, he will guide you into all truth: for he shall not speak of himself; but whatsoever he shall hear, that shall he speak: and he will shew you things to come.
